# ACID IMAGE™

## Show those photos!

View your digital photos on your Palm OS® handheld. There is no need to convert or format your photos in any way. AcidImage™ allows you to read BMP, GIF, and JPEG images directly off your Memory Card or Memory Stick. AcidImage works on both color and grayscale Palm OS handhelds.

### Key Features:

- View JPEG, BMP and GIF images directly off Memory Stick or Memory Card
- High Resolution (320x320, 320x480), Normal Resolution (160x160) and Handera (240x320)
- Hardware-accelerated JPEG decompression (on some Sony CLIE models)
- Fastest Palm OS JPEG viewer
- No file converter needed on PC
- View multiple images with Slideshow feature
- Great for viewing photos directly from your digital camera
